

## ***A match for the Future***

**LM Stålinindustri A/S has acquired the rights to produce, market and sell rendering equipment worldwide under the Lildal A/S name with effect from July 1, 2008. A powerful alternative to projection, construction, production, sales and maintenance of Plants and Plant Elements for the by-product industry has been formed.**

It seems like a perfect match that the two companies have now joined forces. LM Stålinindustri A/S was founded to supply Steel Constructions to Lildal A/S and has for 35 years been a highly qualified supplier and trusted partner to Lildal AS. LM Stålinindustri A/S has been investing in Technology and expanding over the past years and is now ready to take over the responsibilities to grow Lildal and built on the solid Market Position and Reputation earned over the past 60 years.

LM Stålinindustri A/S has a team of approximately 40 qualified and highly motivated employees and has more than 5000 square meters of production facilities on the premises in Randers, Denmark. LM Stålinindustri A/S is a well positioned supplier of Pressure Vessels and specialized subcontracting jobs in the Regional Markets. Whereas Lildal A/S, as a supplier of Machinery and Complete Plants for the By-Product Industry, has a more international Market Position through an established Agents Network.

‘I started my career with Lildal A/S and have been passionate about the Industry and this Market ever since’, Says Peter Bacher, Director and Owner of LM Stålinindustri A/S. ‘This is a unique opportunity for us to expand our business and at the same time grow LM Stålinindustri A/S as well as Lildal A/S. We have already added more capacity in our engineering department and will continue to do so alongside with investments in Technology and Buildings. We are very pleased to take over the great responsibility to continue to market the Lildal A/S brand in the best possible way.’

‘I see the two Companies as being complimentary in Expertise, Products and Services’, says Steen Lildal, Managing Director of Lildal A/S since January 2000. ‘It has been extremely important for us to find a buyer who will serve our customers and build on the reputation of Lildal A/S in the various Markets. I am convinced that this acquisition is for the benefit of the Customers and the two Companies as well. Even though, I will only be remotely involved in the future, the Lildal brand will be in safe hands.’

J. Lildal A/S will continue to independently offer solutions for production of Human Protein on the basis of Animal By-Products; the only part of Lildal A/S not being part of the deal.
